

Dear New Student:

I would like to welcome you to the Rivier University community on behalf of Sr. Mary Anne Quibin Student Health Services. We are located on the first floor of Guild Hall.

Our philosophy is based on our commitment to serving the whole individual: physical, psychological, and spiritual. We hope to be your partner in health while you are a student at Rivier University. It is also our goal to share health and wellness information that will help you throughout and beyond your college years.

Enclosed are copies of required health forms. Please note that many of these forms must be signed by a health care provider, specifically form A, the immunization verification form, and the physical exam form B.

If you have had a physical exam within one year of entering Rivier University, we will accept that as a current physical. In addition, it is imperative that we receive all of your immunization records. Please refer to form A for the list of immunizations we require at Rivier University.

All students (both resident and commuter) need to complete and return Form A- Immunization Verification Form. This two-page form, which includes the "Tuberculosis Screening Form" on page 2, must be signed by your health care provider. The American College Health Association recommends tuberculosis screening for all college and university students.

Commuter Student Forms:

- Form A - Immunization Verification: *the only health form required of commuter students.*

Resident Student Forms:

- Form A – Immunization Verification
- Form B- Health History
- Form B- Physical Exam (Please note that we require specific lab tests on our physical exam form: Hemoglobin/hematocrit and urinalysis.)
- Form C –Permission to Treat
- Patient's Bill of Rights
- Resident Student Health Insurance Form

Quibin Student Health Services provides comprehensive education and referral on a variety of health issues. Our nurse practitioners on staff diagnose and treat common medical conditions such as: strep throat, respiratory illnesses, and urinary tract infections. We can also assist you with management of chronic illness like asthma or diabetes. Please see us if you need first aid supplies- ace wraps, instant ice packs, bandages, antibiotic ointment, etc.

Please note that all required health forms must be received in our office prior to you moving on to campus, as they are required by state law. Forms may be sent to us via scan/email, fax, or by regular mail delivery. Please note that if you send them to us via mail, make copies of each form for yourself prior to sending. We look forward to meeting you, and to helping you as you journey throughout your college years. Again, welcome to Rivier University!
